

## **ABSTRACT**

We create a Java Program for Simple Calculator by using Java Applets, Java Frames , JButton , Action Listener Class and Mouse Listener Class. The Main Objective of this project is to develop a Basic Calculator using JAVA programming Language. This Calculator is based on three operational levels. Those are Standard Mode. Under this categories all the basic functions which are related like addition , subtraction , multiplication , division .

## ACKNOWLEDGEMENT

It gives me immense pleasure to present this section as a tribute to those who always stood by me as a strong and acted as torchbearers for us.

Hereby, my first and foremost thinking goes to **Prof. Paras Kalariya** the knowledge and guidance provide to us on the subject. I gratefully thank him for extending to me his invaluable time and resources.

Now we would like to forward my thinking tribute to **Dr. (Prof.) Amit Ganatra**, Head of Information Technology Department, Charotar University of Science & Technology, to whom I own pleasurable debt for his splendid support, inspiration and thought production.

Finally, I would like to thank our faculty members, department and institute for providing us guidance & resources to make our seminar, a successful story.

Thank You,

Yash Patel (11CE091)
